

Lübeck Funfun Fantasy Park

Lübeck Funfun Fantasy Park is a project that contains a ticket management system as well as displaying relevant information of an entertaining park. It is written in PHP, HTML, CSS and a little bit JavaScript.

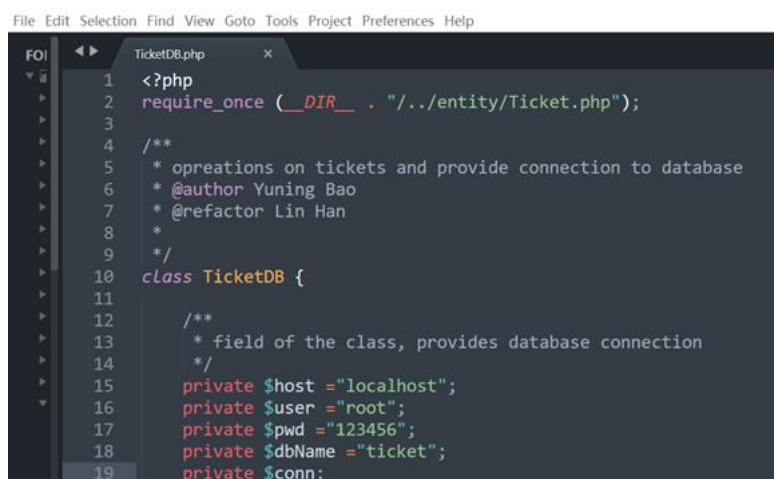

Getting Started

Prerequisites

PHP and MySQL database running environments are set up.

Installation

Database Credentials: First of all, change the database credentials to the credentials of your own database, you can find them on line 15 till line 18 in the Group1Assignment3\entity\TicketDB class file.

```
File Edit Selection Find View Goto Tools Project Preferences Help
TicketDB.php
1 <?php
2 require_once (__DIR__ . "../entity/Ticket.php");
3
4 /**
5  * operations on tickets and provide connection to database
6  * @author Yuning Bao
7  * @refactor Lin Han
8  *
9  */
10 class TicketDB {
11
12     /**
13      * field of the class, provides database connection
14      */
15     private $host ="localhost";
16     private $user ="root";
17     private $pwd ="123456";
18     private $dbName ="ticket";
19     private $conn;
```

Insert SQL file into your database Insert 'ticket.sql' into your database.

Put the file 'Group1Assignment3' under php working directory.

Open the browser to see the index.php.
